

# 5-161 Edge Protections

EPDM

Edge protections are used when steel edges have to be smooth.

- Additional metal machining work can be avoided and an decorative effect is achieved.
  - Edge protection profiles are flexible.
  - The U-shaped steel clip-on tape with a EPDM jacketing provide for firm seating on metal edges, even if there are radii or bends.
  - The profile is simply pressed onto the metal edge by hand, so there is no need for tools, adhesives or connecting elements.
- Edge protection profiles differ in shape and size, depending on the application.
  - Tolerances: see page 07.07.
  - **Customized designs:**
  - If the cross-sections shown here are not suitable for your specific application, we can produce a customized profile to meet your needs.

## Material:

- **Edge protection:** EPDM, black with steel spring core

color	clamping range	packaging unit	Part No.
a) black	1.0 - 2.0mm	*	209-0824*
b) black	5.0 - 8.0mm	*	209-0825*
c) black	5.0 - 6.0mm	*	209-0826*

\* Quantity, price and delivery time on request.
